DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-28, 35-39 and 44-53, drawn to client-server session, classified in class 709, subclass 228.
 - II. Claims 29-34 and 40-43, drawn to call connection and disconnection manager, classified in class 370, subclass 395.2.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions client-server session manager and call connection and disconnection manager are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention client-server session manager has separate utility such as point-to-point data distribution center. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 2662

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
